

SECTION 1 PURPOSE

The purpose of these Standard Construction Specifications is to provide certain minimum standards of materials and methods of construction, repair or alteration of improvements located within public right-of-way, or easements and other improvements for which the Engineering Division is responsible for plan checking and inspection. These improvements include, but are not limited to, streets, sanitary sewer facilities, storm drainage facilities, water distribution facilities, street lights, landscaping, irrigation and other improvements. Any item not included in these specifications shall be constructed in accordance with the July 1995 edition of the State of California, Department of Transportation, Standard Specifications (State Standard Specifications). In the event of conflict between these Standard Construction Specifications and the State Standard Specifications, these Standard Construction Specifications shall govern.

Unless otherwise excluded, these Standard Construction Specifications shall apply to all materials and methods of construction for work performed either under direct contract with the City of West Sacramento or for work performed under contract with other parties for future acceptance by the City for maintenance and/or operation.
