ROUTE CLASSIFICATION DEFINITIONS:

- ARTERIAL: Two/Four lane w/12' lane, plus any shoulder width 0 to 4'
- COLLECTOR: Two lane w/11' or 12' lane, plus any or no shoulder
- LOCAL: Two lane w/less than 10' lane where there is another alternative route to use

* If significant encroachment occurs with loads or combinations, pilot car(s) shall be required

** One additional pilot car may be required for slow moving vehicles or slow moving vehicles with loads

*** Where CHP escort is required, the permitting agent may reduce or eliminate pilot cars with the concurrence of the CHP

○ NOTE: Height poles will be required on all local streets.
TRANSPORTATION PERMIT CONDITIONS
PURSUANT TO CITY ORDINANCE 88-17

1. Possession of Permit:
   a. This permit shall be carried in the vehicle to which it refers at all times while the vehicle is being moved within the highway limits and shall be open to inspection by any peace officer or employee charged with the care and protection of such streets and highways. (Sec. 35783.)

2. Acceptance of the Provisions: It is understood and agreed by the permittee that all conditions have been read, and understood. The permittee agrees to comply with all conditions.

3. Validity of Permit: This permit is only for movement on the assigned streets, highways, over crossovers, under crossings, alternate routes and detours signed as such and approved by the city. The city reserves the right to modify, suspend, or revoke this transportation permit at any time.

4. Void Permit:
   a. This permit is void and hereby declared non-existent if: It is not carried with the vehicle, if it is not signed by an authorized representative of the City of West Sacramento. If any page of this section has been altered or if an attempt to alter is apparent, if presented in a form of a reproduced copy, that is not signed by an authorized representative of the City of West Sacramento, Public Works Department, Traffic/Transportation Section. No reproduced copies are allowed.
   b. If used to represent proper authority for carrying a load and/or moving a vehicle which is not specifically described on the face of the permit.
   c. If used to represent proper authority for carrying a load or moving a vehicle by any company, crew, or equipment not specifically named or organizationally related to the company, agency, or firm to whom the permit was issued.

   d. If presented without the attachments firmly affixed that are, specifically named or organizationally related to the company, agency, or firm to which the permit was issued.

5. Repair of Damage:
   a. This permittee assumes full liability for damage to the streets, highways, utilities, and any structures, buildings, or improvements. The permittee agrees to repair at his own expense to the satisfaction of City Engineer, any damage to public appurtenances or structures. Notwithstanding, work or repair may be done by city maintenance crews at the option of the City Engineer, the cost to be borne by the permittee. In the event to damage to public facilities such as traffic signals, light standards and other appurtenances, a written report must be filed with the city within 72 hours after such damage has been done. Failure to make this report will be considered cause for cancellation of all permit privileges pending a satisfactory arrangement with the city for repair or replacement of the damaged facility.

6. Liabilities: The permittee is responsible for all liability for injury to, or death of any person, or damage to property which may occur through any act or omission or either the permittee or the City of West Sacramento arising from the issuance of this permit. In the event any claim, suit or action is brought against the City of West Sacramento, its officers, employees or agents thereof, by reason of, or in connection with any such act or omission, permittee shall defend, indemnify, and hold harmless the city, its officers, employees or agents from such claim, suit or action.

7. Overload or Overweight Clearance: When weight of load exceeds legal limit, it becomes the responsibility of the permittee to check all underpasses, bridges, overhead wires or other structures for impaired vertical clearance and to bypass or arrange clearance at such locations.

8. Reducible Loads: This permit is issued for the movement of an "Extralegal Load" as defined in CVC 325.5 when loaded at its least dimensions.

9. Tire Capacity: Permitted axle or axle group weights shall not exceed the rated capacity of vehicle tires.

10. Booster Type Axles: A booster axle is an axle, generally, having an air or hydraulic cylinder suspension system that can be actuated independently to approximate a portion of the weight that would otherwise be carried by adjacent axles. Booster axles and add-on or "Joe Day" axles shall not be used in the movement of overweight load permits.

11. Movement During Darkness: "Darkness" is defined in Section 260 of the CVC as being "...any time from one-half hour after sunset to half an hour before sunrise..." Reference to "sunset" and/or "sunrise" on the face of the permit includes this said one-half hour grace period before and after sunset and sunrise. Movement is not allowed when the ambient light is less than 200 ft.

12. Holiday Movement: Unless authorized on the face of this permit, movement is prohibited on the following holidays (or any of these holidays falling on a weekend and celebrated on a weekday): New Year's Day, Martin Luther King's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

13. Moving in Inclement Weather: Movement shall not occur in snow, fog, rain or wind when visibility is restricted to less than 200 feet. Movement is prohibited when road surfaces are hazardous due to rain, ice, snow or frost, or when use of fire chains is mandatory. No movement shall be done when the velocity of the wind is such that it causes the vehicle being towed to sway or swivel from side-to-side or fall to follow substantially in the path of the towing vehicle. Any accident caused by excessive wind or weather conditions shall be considered a prima facie violation of this condition.

14. Movement in Convoy: Movement in convoy shall not be permitted unless specified on the face of the permit.

15. Load Signs: All loads or vehicles being moved on city streets which exceed 8 ft. in width, 80 ft. in length, or more than 10 of overhang shall display appropriate warning signs. Signs shall be posted on front and rear and shall read "LONG LOAD" or "OVERSIZE LOAD." "EXCESSIVE FRONT OVERHANG" or "EXCESSIVE REAR OVERHANG" may be substituted in the "OVERSIZE" sign when appropriate. The "OVERSIZE LOAD" sign shall have preference when length exceeds 100 feet and other over-size features exist. The lettering shall be a 10-inch minimum height with a 1/2-inch minimum brush stroke, and a minimum 1-inch margin all around. All signs shall be black letters on a yellow front and rear. Signs shall be made of cardboard, legible, mounted securely and visible from straight ahead or behind and to 45 degrees from either side thereof.

16. Pilot Car Equipment: It shall be the responsibility of the permittee to ensure that pilot car vehicles and operators are equipped and briefed as to their duties prior to movement. Pilot cars shall be single vehicles with a minimum 60 inches in width, and may operate with a nondestructive vertical clearance measuring device with height in excess of 14 feet.

17. Pilot Car Location and Responsibility: When required, the permit shall list all streets/roads where pilot car(s) are required.

18. Pilot Car Truck:
   a. The pilot car shall: (a) precede the load on two- or three-lane conventional roads and follow on four or more lane conventional highways and divided highways. When two pilot cars are required, one shall precede and one shall follow; (b) remain right of the centerline of the roadway at all times except when prevented by the physical limitations of the highway. The use of a pilot car does not grant to the permittee the right to preempt the opposing traffic lane. When it becomes necessary because of physical limitations of the highway to use a portion of the opposing traffic lane, the permit move shall occupy that lane until it has been advised by the pilot car that the lane is clear of all oncoming traffic. Opposing traffic is not to be stopped, except in extreme emergencies. It shall be the responsibility of the permit move to stop and maintain proper interval between load and the pilot car to allow passing by other traffic; (c) accompany the permitted load over all operational California Highway Patrol facilities.

19. Manufactured Housing Axle Weight: Axle weights for "Manufactured Housing (VC 387) shall not exceed 6,000 pounds per axle.

20. Open Side Covering: Open side units shall be covered by plywood hardboard, or other rigid materials may be used. Billowing or flapping of plastic or flexible side coverings in excess 6 inches in any one place will not be permitted.
TRANSPORTATION PERMIT ATTACHMENT

The permittee shall comply with all standard conditions, pursuant to
City Ordinance 88-17, the California Vehicle Code, and the following restrictions

Contact the City Traffic Engineer for variances

STREET RESTRICTIONS

(Street restrictions includes all posted truck prohibitions and residential neighborhoods, including STAA)

See City Truck Route Map

- Del Monte Street (Weight is negotiable)
- Evergreen Avenue from Coke Street to Sycamore Street
- Galveston Street (Weight and length negotiable)
- Houston Street (Weight and length negotiable)
- North Harbor Blvd from City Limits to Reed Ave
- Old Davis Road is not allowed
- Sacramento Avenue east of Kegle Drive is not allowed (Including "I" St Bridge)
- South River Road from Jefferson Boulevard to Gregory Ave
- Walnut Avenue from West Capitol Ave to Evergreen Ave.

WB = Westbound
Pilot Car(s) shall be required for the following conditions:

1. If the front overhang of a load exceeds 25'-0" when measured from the front bumper or, if there is no front bumper, from the tires. (CVC 35406A)

2. If the boom or mast of a crane, drill rig or well servicing equipment extends more than 25'-0" beyond the front of the front tires. (CVC 35407)

3. If the rears load projection exceeds 25'-0" when measured from the rear extremity of the hauling equipment.

4. Pilot Cars will not be required for the maximum permittable rear boom overhang of 30'-0" when measured from the center of the last axle of the boom support vehicle.

5. If the unsupported rear boom overhang of a truck crane exceeds 30'-0" when measured from the last point of support. The last point of support (for enforcement purposes) is defined as the rearmost point on the vehicle bed or body supporting the load.

6. Generally, if load width exceeds lane width and, if because of length and/or width, the load and/or vehicle will encroach into the adjacent lanes. This assessment will be based on an analysis of the lane width and/or alignment of the roadway. The assignment will be based upon the classification and dimensions of the following chart (Appendix 1). Pilot cars will normally not be required when vehicles/loads are less than 12 feet in width. However, in some circumstances, they will be required when the lanes are reduced to less than 12 feet.

7. Routes for pilot car movements through city streets or roads will be determined by the city’s authorized permitting agent and will be subject to change as determined by the approving agent.
