-------	----------------------------------

Copper-Clad Aluminum Conductors

In accordance with Article 310 of the 2022 California Electrical Code (2021 National Electrical Code), aluminum or copper-clad aluminum conductors type NM-B as defined by Article 100; conductors drawn from a copper-clad aluminum rod with the copper metallurgically bonded to an aluminum core, have been utilized in the construction of this building.

Any alterations to the existing electrical wiring of this home shall be done in accordance with the manufacturer's listed instructions and performed by a trained and certified technician.

An advisory placard shall be permanently affixed to the electrical main service panel stating the product used, manufacturer, manufacturer's contact information, and date of installation.

This completed and signed form must be submitted to the Building Division prior to installation. A duplicate copy to be presented to the developer and/or homeowner upon completion.
