

SECTION 5 ENGINEERING FABRICS

5.01 DESCRIPTION

This work shall include furnishing all the labor, materials, tools and equipment necessary to place the engineering fabrics or geosynthetic materials in accordance with the approved plans and these specifications.

Engineering fabrics shall conform to Section 96 "Geosynthetics" of the State Standard Specifications and shall include pavement reinforcing fabric mats or grids, and light duty road stabilization fabrics. A Certificate of Compliance from the product manufacturer for each type of engineering fabric used shall be furnished to the City Engineer. Engineering fabrics shall be furnished in protective covers to shield against ultraviolet rays, abrasion, and water.
